Introduction

User interface is important to meet user expectations and support the effective functionality of site. The power of UI design is such that it can mean the difference between a very successful application and the worst one. When it comes to create high-quality sites, all of the small details are so important. HCI illustrates the relationship between the computer and its user. The user interfaces (UIs) used in this interaction should be intuitive. For our project we have chosen “Gates N Fences” which is an e commerce site. The UIs of website are completely not organized and not attractive. Because of these reasons this site is not user-friendly. We gathered all the relevant information from different parties, in order to re-design this website attractively, efficiently and effectively.

Methodology

Iron Gate

IRON GATES: This aluminum Gate Frame is 2'x2' at bottom and sides with 2'x2'x1/2" at top and 1" top rail at 10" from bottom this are 50"x120". The more horizontal are repeated about are also 50"x120" with a 1/2" top rail at 10" from bottom. This is a simple gate at 20' high with a design in the bottom. The other three are 20'x120" and the bottom design are accepted in gold.

Butterfly

BUTTERFLY: This Gate Frame is 2'x2' at single side, 12"x12" at bottom, 24"x12" at side panel and also 24"x12" at top. This part of the frame is true solid plate. Panel are 20"x12" with a 1/2" top rail at 10" from bottom. This is a simple gate at 20' high with a design in the bottom. The other three are 20'x12" and the bottom design are accepted in gold.

Royalty

ROYALTY: This Gate Frame is 2'x2' at single side, 12"x12" at bottom, 24"x12" at side panel and also 24"x12" at top. This part of the frame is true solid plate. Panel are 20"x12" with a 1/2" top rail at 10" from bottom. This is a simple gate at 20' high with a design in the bottom. The other three are 20'x12" and the bottom design are accepted in gold.

Diamond Gate

DIAMOND: This Gate Frame is 2'x2' at single side, 12"x12" at bottom, 24"x12" at side panel and also 24"x12" at top. This part of the frame is true solid plate. Panel are 20"x12" with a 1/2" top rail at 10" from bottom. This is a simple gate at 20' high with a design in the bottom. The other three are 20'x12" and the bottom design are accepted in gold.

European Gate

EUROPEAN: This Gate Frame is 2'x2' at single side, 12"x12" at bottom, 24"x12" at side panel and also 24"x12" at top. This part of the frame is true solid plate. Panel are 20"x12" with a 1/2" top rail at 10" from bottom. This is a simple gate at 20' high with a design in the bottom. The other three are 20'x12" and the bottom design are accepted in gold.

Flagrant Gate

FLAGRANT: This Gate Frame is 2'x2' at single side, 12"x12" at bottom, 24"x12" at side panel and also 24"x12" at top. This part of the frame is true solid plate. Panel are 20"x12" with a 1/2" top rail at 10" from bottom. This is a simple gate at 20' high with a design in the bottom. The other three are 20'x12" and the bottom design are accepted in gold.
